## INFINITY

NEW SKILLS

V 1.0

SPECIAL SKILLS

Special Skills are available only to a select few units by virtue of their extensive training, their specialized gear, or their natural ability.

SPECIAL SKILLS AND EQUIPMENT: LABELS

Like Common Skills, all Special Skills and pieces of Equipment have one or more *Labels* that quickly mark them as having certain game features. The *Labels* listed below are an expansion of the Labels series listed in the Infinity N3 rule book:

» **Attack Tactic.** Identifies an aggressive type of Tactic.

» **Support Attack.** Identifies a supportive type of Tactic.

SPECIAL SKILL LEVELS

Some Special Skills are divided into Levels of expertise with distinct effects and uses.

Unless otherwise stated, any **numerical Level** of a Special Skill automatically grants all lower Levels of the same Skill. For example, a Level 3 also grants Levels 1 and 2.

Conversely, **alphabetical Levels** such as Level X state whether they grant any other Levels of the Skill or not.

REMOTE ASSISTANT

This Special Skill allows the user to give a bonus to the *WIP* Attribute value of a trooper who possesses the *Engineer* or *Remote Pilot* Special Skill. Remote Assistant is a Special Skill with several Levels.
REMOTE ASSITANT LEVEL 1
(AUTOMATIC SKILL)

Optional.

REQUIREMENTS

» The user of this Special Skill must be deployed on the game table, as a model or as a Marker.

» The user of this Special Skill cannot be in any *Null* state.

EFFECTS

» This Special Skill provides a **+1 bonus to the WIP** Attribute value of those troopers in your *Army List* that possess the *Engineer* or *Remote Pilot* Special Skills, without requiring any Roll or the expenditure of an Order.

» This +1 *WIP* bonus is not stackable with other bonuses or *WIP MODs* provided by other rules, Special Skills, Equipment, or *Hacking Programs*, except for those who specifically state otherwise.

Remote assistance technicians have the role of providing relevant data and technical support to boots-on-the-ground agents, thus improving their operational capabilities and maximizing their mission success rates. To facilitate their job, technicians are furnished with quick-access libraries on a variety of topics, many of which contain classified materials. These invaluable libraries are certain to be targeted by competing intelligence services, so they are protected by self-deletion protocols in case they should fall into enemy hands.
